

Java

```
class Solution {  
    public int numberOfSpecialChars(String word) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} word  
 * @return {number}  
 */  
var numberOfSpecialChars = function(word) {  
  
};
```

TypeScript

```
function numberOfSpecialChars(word: string): number {  
  
};
```

C++

```
class Solution {  
public:
```

```
    int numberOfSpecialChars(string word) {  
    }  
};  
-----
```

C#

```
public class Solution {  
    public int NumberOfSpecialChars(string word) {  
    }  
}
```

Kotlin

```
class Solution {  
    fun numberOfSpecialChars(word: String): Int {  
    }  
}
```

Go

```
func numberOfSpecialChars(word string) int {  
}
```
